2. A few words about safety

Your safety and safety of others is very important. To help you make informed decisions about safety, we have provided operating procedures and other information in this manual. You will find this as safety messages. Each safety message is preceded by a safety alert symbol and one of the four words: Danger, warning, caution or care.

- **DANGER**
  Indicates an imminently hazardous situation which, if not avoided, will result in death or serious injury.

- **WARNING**
  Indicates a potentially hazardous situation which, if not avoided, could result in death or serious injury.

- **CAUTION**
  Indicates a potentially hazardous situation which, if not avoided, may result in minor or moderate injury.

- **CARE**
  Indicates that equipment or property damage could result if instructions are not followed.

- **Safety instructions**
  Carefully read all safety instructions given in this manual for your safety. Tampering with any of the safety devices can cause serious injuries or death. Keep your tractor in proper condition and do not allow any unauthorised modifications to be carried out on the tractor which may impair the function / safety and affect tractor life.

- **Before you reverse**
  Look behind tractor for children. Do not let riders to ride on tractor or attached implement.

- **Precautions to avoid tipping**
  Do not drive where the tractor could slip or tip. Slow down before you make a sharp turn. Driving forward out of a ditch could cause tractor to tip over backward. Avoid such situations.
• Park tractor safely
Before working on the tractor:
Lower all equipments to the ground
Stop the engine & remove the key

• Keep riders off tractor
Do not allow riders on the tractor.
Riders on tractor are subject to injury
such as being struck by foreign objects
and being thrown off the tractor.

• Handle fuel safely – avoid fires
Handle fuel with care: It is highly
flammable. Do not refuel the tractor
while smoking or near open flame
or sparks. Always stop engine before
refueling tractors. Always clean up
spilled fuel.

• Stay clear of rotating shafts
Entanglement in rotating shaft can
cause serious injury or death. Keep
PTO shield in place at all the times.
Wear close fitting clothing. Stop the
engine and be sure the PTO drive is
stopped before making adjustments,
connections, or cleaning out PTO
driven equipment.

• Practice safe maintenance
Understand service procedure before
doing work. Keep the surrounding
area of the tractor clean & dry. Do
not attempt to service the tractor when
it is in motion. Always lower
equipment to the ground. Stop the
engine, remove the key. Allow tractor
to cool before any work / repair is
carried on it, to prevent burns.
Avoid high pressure fluids
Escaping fluid under pressure can penetrate the skin causing serious injury. Keep hands & body away from pinholes and nozzles which eject fluid under high pressure. If any fluid is injected into the skin. Consult your doctor immediately.

Prevent battery explosions
Keep sparks, lighted matches, and open flame away from the top of the battery. Acid fumes can explode. Never check battery charge by short circuiting across the poles.

Prevent acid burns
Sulphuric acid in battery electrolyte is poisonous. It is strong enough to burn skin, cause holes in clothing, and cause blindness if found entry into eyes.

If you spill electrolyte on yourself
1. Flush your skin with cold water immediately.
2. Flush your eyes with water for 10-15 minutes. Get medical attention immediately.

Do not operate the tractor in an enclosed building without adequate ventilation. Exhaust fumes can cause death.
